Miniature Steam & Model Weekend

22nd & 23rd of September, 2007

Programme

AMBERLEY working museum

Welcome to the 2007 Miniature Steam & Model Weekend!

As always, we have an excellent array of models for your enjoyment, and we are very grateful to all the exhibitors for their enthusiastic and continued support. Many of the miniature steam traction engines will be in action around the site throughout the day, and the model steam railway and model boats will also be in operation. In addition to this, there will be a grand parade in the area to the front of the Radio building at 3pm each day.

For your own safety, please be aware of models on the move, and do not under any circumstances touch the engines, as many will be hot, and all will have moving parts. We also ask you to ensure that small children and dogs are kept under proper control.

We hope you enjoy your day!
